## L I G H T I N G

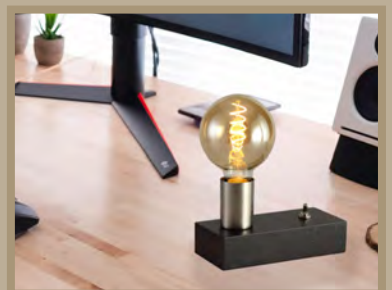

Inspired Lighting was founded in 2006 with an industry experience of over 30 years and a passion to bring to the market unique designs and bring some fresh inspiration to the industry. Within this short period of time we now operate from 3 countries serving customers on a global scale. Our sales distribution operation consists of a 90,000sq ft head office in Heywood in the North West of the UK near Manchester followed by offices, showroom and substantial warehousing in Dubai and New Delhi. All 3 locations offer unrivalled stock availability and customer service to their neighbouring countries and beyond.

Our dedication and desire for design has been fundamental in developing a product range which currently consists of more than 6000 items across 7 brands. Every brand has been developed to provide lighting solutions to a certain segment of the industry yet every product has the same focus on quality, functionality and appearance. Such a comprehensive range of products can only be successful if backed by superior customer service. At Inspired Lighting we pioneered a next day delivery service within the industry and pride ourselves in having a 'can do' attitude throughout the company. Every challenge is treated as an opportunity to learn and develop. In recent years we have seen the biggest changes the lighting industry has ever seen. Whilst any change creates confusion and uncertainty, our designers have taken this opportunity to work with new technologies and create spectacular designs with distinctive personalities, that simply were not possible before. As we take great pride in offering some of the most innovative and creative lighting products to the market place we also invest heavily in protecting these designs for our designers and customer's benefit alike.

Initially our customer bases were fundamentally specialist lighting and furniture retailers, the appeal of our products has also lead us into numerous projects ranging from boutique restaurants and hotels to offices and airports. Our extensive knowledge and experience coupled with our spectrum of products, further enhanced with our in-house production department, allows us to provide comprehensive solutions for any domestic or commercial lighting requirement.

Inspired Lighting.....

## Illumination As Nature Intended

## Welcome to the new D'eco Edition Six catalogue from Inspired Lighting

Deco represents our portfolio of decorative lighting fixtures and custom products to transform countless spaces at competitive pricing without comprising quality. The design team ensures that the products serve the most current demands as well as offering more traditional solutions. Utilising our wide range of capabilities in a variety of materials and production techniques enables us to meet your design needs. Our creative ranges have provided illumination in various hospitality, retail and residential projects. By combining trends and styles new possibilities are born.

The designers behind Deco believe that our products should be designed by application and consequently they offer solutions for today's demanding market. These demands are often coupled with short delivery times and restricted budgets, the kind of challenges we strive on. By allowing us to take the responsibility of your lighting requirements you can benefit from our accumulative industry experience and passion for over 40 years.

Our service of offering tailored packages to your turnkey project is simply the best way to ensure all your lighting requirements are taken care of professionally and accurately. We believe lighting must have the perfect balance of aesthetics, intensity and functionality, only then will your space be shown in its full glory.

The Deco range is also proving to be hugely successful amongst wholesalers and retailers alike as the products not only offer value for money but are backed by the highest level of service and support that Inspired Lighting has been built upon. The flexibility of the Deco range results in effectively responding to market demands and changes.

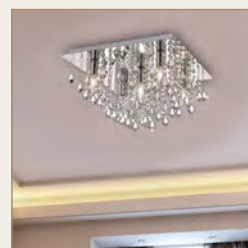

Combined with the extensive range of light sources under our Luxram range the creativity, performance and solutions we can offer is simply endless.
